CONTENTS OF VOLUME 44

Number 1

J. A. HURTADO, J. DUNDURS and T. MURA	1	Lamellar inhomogeneities in a uniform stress field
T. H. HAO, X. GONG and Z. SUO	23	Fracture mechanicss for the design of ceramic multilayer actuators
V. P. SMYSHLAEV and J. R. WILLIS	49	Effective relations for nonlinear dynamics of cracked solids
T. W. WRIGHT and J. W. WALTER	77	The asymptotic structure of an adiabatic shear band in antiplane motion
A. DELAPLACE, G. PIJAUDIER-CABOT and S. ROUX	99	Progressive damage in discrete models and consequences on continuum modelling
Y. BENVENISTE	137	Thermal expansion of polycrystalline aggregates consisting of elongated crystals and containing cylindrical pores or inclusions
	155	Announcements

Number 2

M. X. CHEN, Q.-S. ZHENG and W. YANG	157	A micromechanical model of texture induced orthotropy in planar crystalline polymers
J. LUFRANO, P. SOFRONIS and H. K. BIRNBAUM	179	Modeling of hydrogen transport and elastically accommodated hydride formation near a crack tip
N. B. THOMSEN and B. L. KARIHALOO	207	Subsurface and surface cracks under contact loading in tranformation-toughened ceramics
L. V. GIBIANSKY and S. TORQUATO	233	Bounds on the effective moduli of cracked materials
A. A. YEVTUSHENKO and R. D. KULCHYTSKY-ZHYHAILO	243	Approximate solution of the thermoelastic contact problem with frictional heating in the general case of the profile shape
G. GIOIA and M. ORTIZ	251	The two-dimensional structure of dynamic boundary layers and shear bands in thermo-viscoplastic solids

Number 3

C.-Y. WANG	293	The stress field of a dislocation loop in an anisotropic solid
M. BORNERT, C. STOLZ and A. ZAOUI	307	Morphologically representative pattern-based bounding in elasticity
F. COSTANZO, J. G. BOYD and D. H. ALLEN	333	Micromechanics and homogenization of inelastic composite materials with growing cracks
M. D. THOULESS, H. YU, Z. ZHAO and W. YANG	371	Damage nucleation during electromigration along an isolated interface in an elastic medium
J.-Q. TARN	389	Elastic buckling of multilayered anisotropic plates
G. SCHOECK	413	Dislocation emission from crack tips as a variational problem of the crack energy
K. K. MATHUR, A. NEEDLEMAN and V. TVERGAARD	439	Three dimensional analysis of dynamic ductile crack growth in a thin plate

Number 4

V. P. SMYSHLYAEV and N. A. FLECK	465	The role of strain gradients in the grain size effect for polycrystals
W. J. DRUGAN and J.R. WILLIS	497	A micromechanics-based nonlocal constitutive equation and estimates of representative volume element size for elastic composites
L. ANAND and M. KOTHARI	525	A computational procedure for rate-independent crystal plasticity
B. SUN, Z. SUO and A. C. F. COCKS	559	A global analysis of structural evolution in a row of grains
P. BISEGNA and R. LUCIANO	583	Variational bounds for the overall properties of piezoelectric composites
L. XIA and C. F. SHIH	603	Ductile crack growth—III. Transition to cleavage fracture incorporating statistics
	641	Announcement
	i	Keywords

Number 5

SPECIAL ISSUE

MECHANICS AND PHYSICS OF LAYERED AND GRADED MATERIALS

	643	Preface
	645	Acknowledgements
B. ILSCHNER	647	Processing–microstructure–property relationships in graded materials
C. V. THOMPSON and R. CAREL	657	Stress and grain growth in thin films
F. SPAEPEN	675	Substrate curvature resulting from the capillary forces of a liquid drop
M. FINOT and S. SURESH	683	Small and large deformation of thick and thin-film multi-layers: effects of layer geometry, plasticity and compositional gradients
L. B. FREUND	723	Some elementary connections between curvature and mismatch strain in compositionally graded thin films
J. T. WOOD, A. J. GRIFFIN JR, J. D. EMBURY, R. ZHOU, M. NASTASI and M. VERON	737	The influence of microstructural scale on the combination of strength and electrical resistivity in copper based composites
X. GONG and Z. SUO	751	Reliability of ceramic multilayer actuators: a nonlinear finite element simulation
Y. F. CHEN and F. ERDOGAN	771	The interface crack problem for a non-homogeneous coating bonded to a homogeneous substrate
V. TVERGAARD and J. W. HUTCHINSON	789	On the toughness of ductile adhesive joints
M. C. SHAW, T. W. CLYNE, A. C. F. COCKS, N. A. FLECK and S. K. PATERAS	801	Cracking patterns in metal–ceramic laminates: effects of plasticity
J. D. EMBURY, L. B. FREUND, A. NEEDLEMAN, C. F. SHIH, F. SPAEPEN and S. SURESH	823	Summary

Number 6

P. PONTE CASTAÑEDA	827	Exact second-order estimates for the effective mechanical properties of nonlinear composite materials
A. M. CUITIÑO and M. ORTIZ	863	Three-dimensional crack-tip fields in four-point-bending copper single-crystal specimens
M. E. GURTIN and P. PODIO-GUIDUGLI	905	Configurational forces and the basic laws for crack propagation
A. AZHDARI and S. NEMAT-NASSER	929	Energy-release rate and crack kinking in anisotropic brittle solids
S. LECLERCQ and C. LEXCELLENT	953	A general macroscopic description of the thermomechanical behavior of shape memory alloys
M. ZHOU, A. J. ROSAKIS and G. RAVICHANDRAN	981	Dynamically propagating shear bands in impact-loaded prenotched plates—I. Experimental investigations of temperature signatures and propagation speed
M. ZHOU, G. RAVICHANDRAN and A. J. ROSAKIS	1007	Dynamically propagating shear bands in impact-loaded prenotched plates—II. Numerical simulations
	i	Keywords

Number 7

J. SWEENEY and I. M. WARD	1033	A constitutive law for large deformations of polymers at high temperatures
O. P. BRUNO, F. REITICH and P. H. LEO	1051	The overall elastic energy of polycrystalline martensitic solids
J. F. GANGHOFFER and J. SCHULTZ	1103	Geometrically non-linear modelling of contact problems involving thin elastic layers
Z. HASHIN	1129	Finite thermoelastic fracture criterion with application to laminate cracking analysis
K.-H. TSAI and K.-S. KIM	1147	The micromechanics of fiber pull-out
M. AVELLANEDA, A. V. CHERKAEV, L. V. GIBIANSKY, G. W. MILTON and M. RUDELSON	1179	A complete characterization of the possible bulk and shear moduli of planar polycrystals
	1219	Corrigendum
	i	Keywords

Number 8

Z.-H. JIN and R. C. BATRA	1221	Some basic fracture mechanics concepts in functionally graded materials
V. TVERGAARD	1237	Effect of void size difference on growth and cavitation instabilities
X. GAO, C. F. SHIH, V. TVERGAARD and A. NEEDLEMAN	1255	Constraint effects on the ductile–brittle transition in small scale yielding
Y. ZHU, A. SHUKLA and M. H. SADD	1283	The effect of microstructural fabric on dynamic load transfer in two dimensional assemblies of elliptical particles
V. K. KINRA and J. E. BISHOP	1305	Elastothermodynamic analysis of a Griffith crack
D. BIGONI	1337	On smooth bifurcations in non-associative elastoplasticity
J. R. WALTON	1353	On a dynamically accelerating Dugdale-zone in elastic and viscoelastic material
L. TRUSKINOVSKY and G. ZANZOTTO	1371	Ericksen's bar revisited: energy wiggles
	1409	Announcement
	i	Keywords

Number 9

J. L. BEUTH and N. W. KLINGBEIL	1411	Cracking of thin films bonded to elastic–plastic substrates
A. C. F. COCKS	1429	Variational principles, numerical schemes and bounding theorems for deformation by Nabarro–Herring creep
H. GAO	1453	A theory of local limiting speed in dynamic fracture
E. RADI and D. BIGONI	1475	Effects of anisotropic hardening on crack propagation in porous-ductile materials
M. L. DUNN, H. LEDBETTER, P. R. HEYLIGER and C. S. CHOI	1509	Elastic constants of textured short-fiber composites

M. J. BERAN, T. A. MASON, B. L. ADAMS and T. OLSON 1543 Bounding elastic constants of an orthotropic polycrystal using measurements of the microstructure

i Keywords

Number 10

B. L. KARIHALOO, J. WANG and M. GRZYBOWSKI 1565 Doubly periodic arrays of bridged cracks and short fibre-reinforced cementitious composites

J. POUTET, D. MANZONI, F. HAGE-CHEHADE, C. J. JACQUIN, M. J. BOUTÉCA, J.-F. THOVERT and P. M. ADLER 1587 The effective mechanical properties of random porous media

Z. C. XIA and J. W. HUTCHINSON 1621 Crack tip fields in strain gradient plasticity

P. DE BUHAN and L. DORMIEUX 1649 On the validity of the effective stress concept for assessing the strength of saturated porous materials: a homogenization approach

H. CHAI and M. Y. M. CHIANG 1669 A crack propagation criterion based on local shear strain in adhesive bonds subjected to shear

P. STEINMANN 1691 On localization analysis in multisurface hyperelasto-plasticity

C.-Y. HUI, S. L. PHOENIX and L. KOGAN 1715 Analysis of fragmentation in the single filament composite: roles of fiber strength distributions and exclusion zone models

i Keywords

Number 11

S. B. LIN and J. L. DING 1739 A modified form of Hill's orientation-dependent yield criterion for orthotropic sheet metals

M. A. ZIKRY and M. KAO 1765 Inelastic microstructural failure mechanisms in crystalline materials with high angle grain boundaries

S. LI and P. A. MATAGA 1799 Dynamic crack propagation in piezoelectric materials—Part I. Electrode solution

S. LI and P. A. MATAGA 1831 Dynamic crack propagation in piezoelectric materials—Part II. Vacuum solution

W. S. SLAUGHTER, J. FAN and N. A. FLECK 1867 Dynamic compressive failure of fiber composites

N. TRIANTAFYLLIDIS and S. BARDENHAGEN 1891 The influence of scale size on the stability of periodic solids and the role of associated higher order gradient continuum models

S. SHKOLLER and A. MAEWAL 1929 A model for defective fibrous composites

1953 Announcements
